

EVOCATIVE

Visiting Maison et Objet we were pleasantly hit by the evocative qualities of light shown at the Haberdashery stand. After Dark strikes the eye like a precious jewel or a piece of futurist sculpture. The spectacular new Introvert Extrovert allows you to transition between two distinct identities. Perfectly finished, the pure and simple geometry of Haberdashery luminaires seem to guide us towards higher things. Aspirations, hopes and memories. Qualities reaching far beyond the expectations of any ordinary lamp. The ambition to find new ways for the user to interact with light, encourages the Haberdashery team to strive for new concepts reaching out into the imaginary. The award-winning Dawn to Dusk range evokes the image of a rising and setting sun. Shifting the disk on its post reflects transitions from deep, rich reds and orange, into peach hues, through to the white light of midday.

haberdashery.com

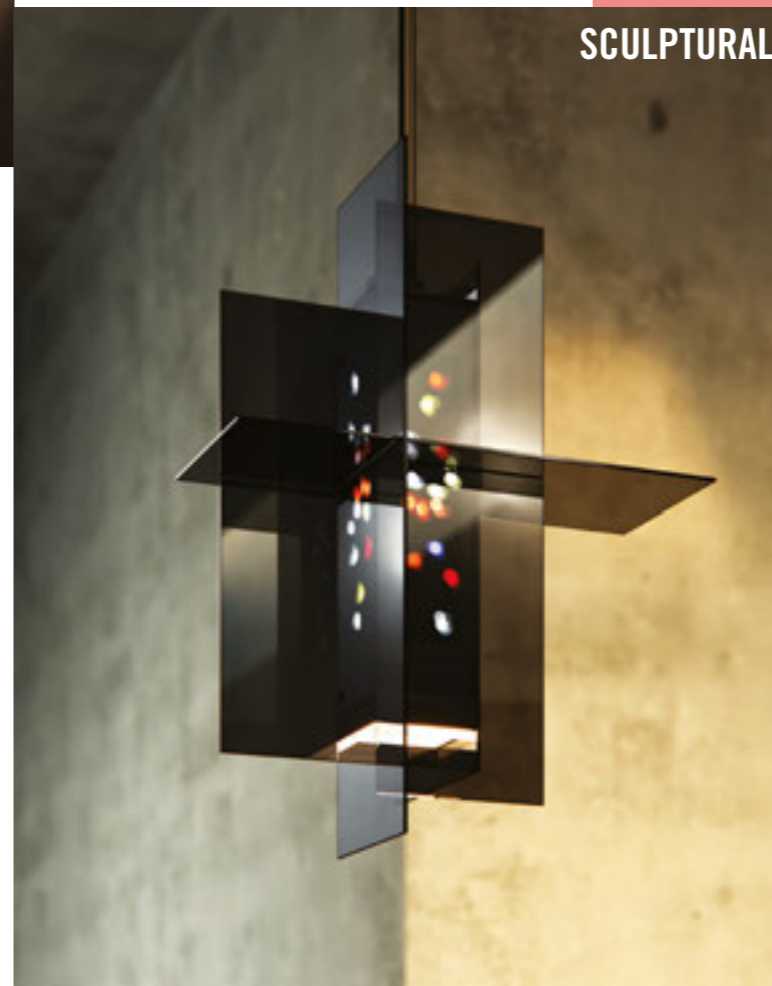

A \ Dawn to Dusk -
The series offers an eye catching wall mounted disk (1 meter diametre) and two smaller versions: a free standing and a table model. All models add to the experience of space and time.

L \ Introvert Extrovert
was newly launched at Maison & Objet September this year.

SCULPTURAL

**A ** Details of both the After Dark and the color range of the Dawn to Dusk lighting features.

**L ** After Dark looks mysterious, enveloping the source of light within a sculpture of intersecting planes of dark glass, reminiscent of the skin of skyscrapers; reflections of a far away metropolis at night. Available in two sizes the large version looks more monumental, the smaller models can be used individually or as multiples, bringing the atmosphere of the city into your home.
